

I don't have much to do with this side of it for a few years now but I just took a look and all but FRR14308 shows on us but in three different yards.

Know what you mean, the 4524 maybe here they never would take it back and the 4497 we have been trying to send back for almost 2 years. Attached are the ones that we have and are paying on except for CMQ 4499 & 4498 which are here but we don't pay on and they should be scrapped.

This wouldn't surprise me, Keystone has been horribly un-organized

Chad – see below and attached. Some of these cars I am pretty sure are not on us. The 4504 & 4254 were rejected and sent back a while back.

Thanks,
Jerry

Good afternoon Jerry, I'm working as the broker for Keystone Railcar and their fleet of boxcars that we currently have for sale. I have a Buyer who would like to inspect the following cars that are located in Bangor (see attached list). Is there a contact person I can speak with to get the Buyer on the property to inspect the cars? Also please let me know if there are issues preventing a sale such as storage/repair charges. I suspect my Buyer may want to scrap the cars on site, as long as they have insurance will that be a problem? Thanks for your time and look forward to your reply.
