Re: Trackmobile Appraisal

Dear Mr. Gregory,

Thank you for your recent request for a Brokers Opinion of Value on the 4150 Magnum Trackmobile. In accordance with your request, we have reviewed the information available to our office regarding the machine. This data includes historical records on construction, current physical condition, recent upgrades/repairs and current market conditions. This data is analyzed to create an accurate determination of the current market value for said items. Please keep in mind that due to the unique nature of railroad equipment, comparable sales data is not always available, and our determination of value may be affected by factors beyond our control or that we were not aware of at the time of rendering our opinion. Our determination of value is primarily based on what we would recommend the list price to be if the item was placed on the current market and based on the information available to us at the time the valuation is made.

If I can be of further assistance or if you have any questions regarding this evaluation please feel free to contact me at any time.

Respectfully,

A handwritten signature in black ink that reads "R. John Suscheck". The signature is written in a cursive style with a large, stylized initial "R".

R. John Suscheck/CEO  
Ozark Mountain Railcar
